# introduction

---

Amna Industries is a leading textile company that specializes in yarns, knitting, dyeing and garment manufacturing for the fashion industry. Founded in 2001, the company began our journey as a small spinning and weaving unit in the Al-Karam Group of Companies, and has had a long-standing reputation for producing high-quality textiles that are used to create innovative and on-trend products.

Evolving through time, we are now an independently owned company and have invested in a vertical spinning mill and a state-of-the-art processing unit for open-width and tubular knitted fabric. Our modern facility is equipped with the latest technology and machinery, allowing us to produce a wide range of articles, made from classic natural fibers to cutting-edge synthetic blends. We use sustainable and environmentally-friendly dyeing processes to ensure that our products not only look great, but are also kind to the planet.

We work closely with our clients, from independent designers to global fashion houses, to bring their ideas to life. Our team of experienced technicians and designers work together to create merchandise that are not only fashionable but also functional, durable, and easy to care for. Our products have been used in collections by some of the most renowned fashion designers and brands in the industry.

It's worth mentioning that fast fashion often comes with a high environmental and social cost, it is important to highlight our sustainable and ethical practices implemented to stand out in the fast-fashion industry. Our commitment to quality and innovation has been recognized with various certifications like ISO 9001, 14001 and 18001 certified as well as GOTS, GRS, Oekotex and BSCI.

Whether you're looking to launch a new clothing line or revitalize an existing one, we are here to help. Connect with us to discover how we can help bring your fashion vision to life.

spinning

---

At Amna Industries, we take great satisfaction in our state-of-the-art spinning unit, which is designed to deliver the highest quality yarns for our customers. Our spinning unit is equipped with the latest technology and machinery, ensuring that our production processes are efficient, consistent, and eco-friendly.

Our spinning unit is staffed with a team of highly skilled technicians who are trained to operate our equipment with the utmost precision and attention to detail. Our teams work tirelessly to ensure that our yarns meet the exact specifications of our customers, and that they are produced to the highest quality standards.

We are proud to say that our spinning unit has 37,000 spindles and 1,800 rotors and 1,200 two-for-one doubling machines, and has earned top-of-the-class recognition in the industry, thanks to our commitment to excellence and sustainability. Our customers can be confident that when they choose our yarns, they are getting products that are not only of the highest quality, but are also produced with the utmost care for the environment.

We have top branded machines in our spinning department and have made a name for ourselves in the market as one of the top hosiery, weaving and towel yarn manufacturing facility.

# Knitting

---

We're committed to providing our clients with top-quality knit fabric for their garments. That's why we have invested in an in-house knitting facility that allows us to control the entire production process, from yarn selection to final garment assembly.

Our state-of-the-art knitting machines are capable of producing a wide range of knit fabrics, including jersey, rib, interlock, fleece, pique and more.

We use only the best quality raw materials to create fabrics that are soft, durable, and comfortable to wear. Since, we control the entire knitting process, we can ensure that our fabrics are consistent in quality, batch to batch, time and again.

It also allows us to be more flexible and responsive to our clients' needs. We can quickly prototype new designs and fabrics, and we have the capacity to produce small to large quantities of knit fabrics on short notice.

# processing

---

We, at Amna Industries, understand that the dyeing process is critical to the quality and appearance of the fabric. That's why we have a maintained, state-of-the-art dyeing facility that can handle up to 40 tons of fabric per day, and can cater to a wide variety of knit fabrics. It gives us an edge in providing our customers with a wide range of color options and customizations, that we can do quickly and efficiently. This allows us to meet their demands, regardless of the complexity of their orders.

Our dyeing facility is staffed by a team of highly skilled technicians having versatile understanding in their field. They are trained to handle a wide range of fabrics, including cotton, polyester, nylon and blends, and are skilled at producing vibrant, long-lasting colors that meet the exact specifications of our customers. It operates with the modern equipment, including computerized color matching and dispensing systems, as well as high-efficiency machinery that minimizes water and energy consumption. This ensures that our production processes are not only efficient, but also, environmentally friendly.

We have Thies, Canlar Mechatronic and Fong's soft flow dyeing machines in our wet processing department while Santex slitters, dryers and felt compactor finishing line which ensures consistent dyeing and immaculately soft hand feel. To ensure versatility, we also have a 2.2 meter stenter which allows us to finish all kinds of fabric. We have recently added a brand new tubular line with E+L padder, Elteksmak dryer and a TubeTex compactor, with which we have achieved our vision of being the most diverse knits processing house of southern Pakistan.

With us, you can be confident that your knit fabrics will be dyed to perfection, with the utmost care for quality, efficiency, and the environment.

# stitching

---

Amna Industries has a strong reputation for manufacturing a wide range of high-quality knit garments with top-class workmanship. Our skilled manufacturing team is well-versed in the latest fashion trends and techniques, and are capable of producing knit garments that meet the highest standards of quality and craftsmanship.

Whether you need t-shirts, sweatshirts, hoodies, or any other type of knit garment, we have the expertise and capacity to manufacture them. We use only the best materials and cutting-edge equipment to make our knit garments, ensuring that they are both stylish and durable. Our skilled workmen take great care to ensure that each garment is cut and sewn with precision and attention to detail, resulting in a finished product that looks and feels great.

We have the capacity to produce 400,000 units per month, with a plan to increase it to one million pieces per month through a purpose-built LEAD GOLD certified brand new stitching facility under construction. We have the potential to deliver top-class workmanship on every shipment, no matter how big or small. We are committed to working closely with our clients to understand their needs and preferences, and to deliver knit garments that meet or exceed their expectations. If you're looking for a reliable partner for your knit garment manufacturing needs, look no further than Amna Industries.

design

---

Welcome to our design studio in Spain, where we are inspired by the richness of cultures and values that surround us. Spain is a country that has been shaped by the convergence of various cultures over centuries, from the Romans to the Moors, and beyond. This diversity has given rise to a unique blend of art, architecture, and design, all of which have been influenced by the values of tradition, innovation, and creativity.

At our design studio, we strive to capture this spirit of diversity and richness in our work. We are passionate about creating designs that reflect the values and aspirations of our clients, while also incorporating the cultural heritage of the world. Whether it's through the use of traditional materials and fits or the incorporation of modern techniques, we seek to create designs that are both timeless and innovative.

Our team of designers draws upon their expertise in a range of design disciplines. With a deep understanding of the global context in which we work, we are able to deliver designs that are not only visually stunning but also meaningful and relevant.

We believe that design is a powerful tool for communication, and our goal is to use our expertise to help our clients tell their stories and express their values. Whether you are looking to create a garment that is functional and beautiful, or to communicate your message through embellishment and design, our studio is ready to help you bring your vision to life.

Cotton Modal Blend  
Poly Modal Blend  
Tri-blends (Cotton, Viscose, Poly, Lycra, T-400, Naia, Modal)  
Recycled Cotton / Recycled Poly  
Organic Cotton

sustainability

---

To ensure that we meet our commitments, we have our own Self-Generation Prime Power Plant to supply uninterrupted power and to further reduce emissions we installed waste heat recovery boilers to supply saturated steam to the processing unit.

We use subsoil water for dyeing after treatment in reverse Osmosis plants to keep our water source stable and consistent. Furthermore, we have a wastewater treatment plant which fulfills our environmental obligations to ensure that we are not a burden to our environment.

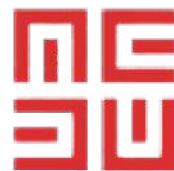

In addition to our cutting-edge machinery and expert staff, our manufacturing facility is designed to be environmentally friendly. We have invested in sustainable practices and technologies to minimize our environmental footprint, including water and energy conservation measures, and recycling initiatives.
